

CS215 – Web and Database Programming

Group:16

Name: Huynh Ngoc Anh Tuan

Student ID: 200490673

2 usernames :

- nhp892 (Pass: 12345678)
 - tpk213 (Pass: 12345678)
- General: there are 6 pages and 1 supporting page
- Login Page (login.php)
<http://www.webdev.cs.uregina.ca/~nhp892/Assignment6/login.php>
- ➔ This page will automatically show 5 most recent created assignments based on the assignment ID (descending order)
 - ➔ Also, this page will show the just created assignment after 2 minutes as long as creating assignment.
- Home Page (main.php)
<http://www.webdev.cs.uregina.ca/~nhp892/Assignment6/main.php>
- ➔ This page will automatically show 20 most recent created assignments based on the assignment ID (descending order)
 - ➔ Also, this page will show the just created assignment after 2 minutes as long as creating assignment.
 - ➔ As well as that, it will check if user has logged in or not.

- Detail Page (detail.php)
<http://www.webdev.cs.uregina.ca/~nhp892/Assignment6/detail.php>
- ➔ This page will automatically update the just created feedback with the announcement by changing a CSS style after 2 minutes as long as user pressed “submit”.

- Sign up Page (signup.php)
<http://www.webdev.cs.uregina.ca/~nhp892/Assignment6/signup.php>
- ➔ This page is connected to database in order to store the inputted data after checking all validation.
 - ➔ If there were errors of validation or storing issues, this page would notice user to input the valid information (that go along with the

instructor).

➔ If there was not any error, this page is automatically gone to login page.

- Assignment Management Page (manage.php)

<http://www.webdev.cs.uregina.ca/~nhp892/Assignment6/manage.php>

➔ This page firstly checks whether the user's ID is authenticated, if not that will go back to the Login Page.

➔ This page will retrieve all assignments for the logged in user from the database, and then show all information of each specific assignment based on the due date (descending order).

➔ There is a link to the Assignment Detail Page and a link to the Assignment Creation Page.

- Assignment Creation Page (creation.php)

<http://www.webdev.cs.uregina.ca/~nhp892/Assignment6/creation.php>

➔ This page firstly checks whether the user's ID is authenticated, if not that will go back to the Login Page.

➔ This page will validate all the required elements in the form, which are present and in the proper format.

➔ This page is connected to the database in order to store all elements if the data is good. And then, automatically return user to the Assignment Management Page.

➔ If the data is not good, this page will notice user with the instructor.
